

Product Anatomy

Motor run capacitors features:

- ◆ Non induction winding structure of metallic polypropylene membrane.
- ◆ It is small in bulk, has long life-span and good self-healing characteristic.
- ◆ High insulating resistance, little temperature changing inside, excellent stability of capacitance.
- ◆ Non-toxic and non-leaking, profit environmental protection.

Usages:

- ◆ Suitable for starting and operating 50Hz(60Hz) AC single-phase electromotor.
- ◆ Widely used as the start-up and running capacitor that is special for micro water pump, cleaning machine, washing machine, and single-phase household electrical appliances.

Motor run capacitor alternate design include the followings:

- ◆ Use round plastic shell, and insulation sealed lid for sealing, plastic lid for sealing or resin for sealing.
- ◆ Flat bottom or fixing stud M8*12
- ◆ Fasten terminals, Lug, wire, cable.
- ◆ Plastic can, ABS, PC.
