规格目录中所列的产品, 材料和尺寸其他内容如有更改, 恕不另行通知。

Specifications of products, materials and dimensions listed in the specification catalog are subject to change without prior notice.

1、 品名说明Product name representation

<A >JYH HSU (JEC)

J = JEC

<B >产品直径Dimension (mm)

|                   |    |    |    |    |    |    |    |    |
|-------------------|----|----|----|----|----|----|----|----|
| 代码Code            | 05 | 07 | 09 | 11 | 13 | 15 | 20 | 25 |
| 产品直径<br>Dimension | 5  | 7  | 9  | 11 | 13 | 15 | 20 | 25 |

<C >形状/类型

D：圆形      W：大功率型      S：方形

<D >额定功率阻值Rated power resistance (Ω)

|                                     |     |     |     |     |     |     |     |     |     |      |
|-------------------------------------|-----|-----|-----|-----|-----|-----|-----|-----|-----|------|
| 代码Code                              | 0R7 | 1R3 | 2R5 | 5R0 | 8R0 | 100 | 250 | 800 | 121 | 102  |
| 额定功率阻值<br>Rated power<br>resistance | 0.7 | 1.3 | 2.5 | 5   | 8   | 10  | 25  | 80  | 120 | 1000 |

采用科学表示法，单位Ω。如果数值包含小数点，则用符号“R”将整数部分和小数部分隔开。例如：  
050：5×10^0=5              0R7：0.7              2R5：2.5              102：10×10^2=1000

<E >阻值误差Tol.

|           |      |      |      |
|-----------|------|------|------|
| 代码Code    | K    | L    | M    |
| 阻值误差 Tol. | ±10% | ±15% | ±20% |

<F >引出脚型 Lead forming(mm)

|                |   |   |   |
|----------------|---|---|---|
| 1(长脚)/ 3 (短直脚) | 2 | 4 | 7 |
|                |   |   |   |

<G>脚距Lead space (mm)

| 代码Code           | A    | B  | C    | D  | E    | F  | G    | H  | J    | K  |
|------------------|------|----|------|----|------|----|------|----|------|----|
| 脚距<br>Lead space | 2.5  | 3  | 3.5  | 4  | 4.5  | 5  | 5.5  | 6  | 6.5  | 7  |
| 代码Code           | L    | M  | N    | P  | Q    | R  | S    | T  | U    | V  |
| 脚距<br>Lead space | 7.5  | 8  | 8.5  | 9  | 9.5  | 10 | 12.5 | 15 | 17.5 | 20 |
| 代码Code           | W    | X  | Y    | Z  | 2    | 3  |      |    |      |    |
| 脚距<br>Lead space | 22.5 | 25 | 27.5 | 30 | 31.5 | 32 |      |    |      |    |

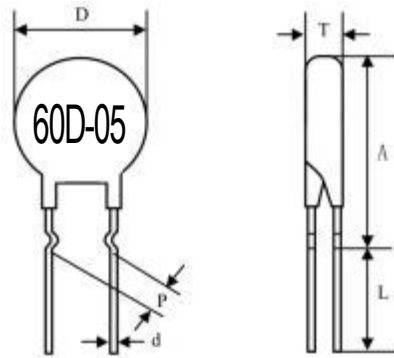

<H>脚长Lead length (mm)

| 代码Code            | 25  | 30 | 35  | 40 | 45  | 50     | 55     | 60   | 65  | 70 |
|-------------------|-----|----|-----|----|-----|--------|--------|------|-----|----|
| 脚长<br>Lead length | 2.5 | 3  | 3.5 | 4  | 4.5 | 5      | 5.5    | 6    | 6.5 | 7  |
| 代码Code            | 75  | 80 | 85  | 90 | 95  | A0 ~A9 | B0 ~B9 | NN   | TT  | CC |
| 脚长<br>Lead length | 7.5 | 8  | 8.5 | 9  | 9.5 | 10 ~19 | 20 ~29 | 散裝常規 | 編帶  | 其他 |

<I>颜色Color

E：黑色酚醛      G：绿色硅树脂      H：灰色硅树脂

## 2、外形尺寸 Shape Size ( Unit:mm)

| 型号Type  | 产品外形尺寸(mm) Shape Size |       |         |          |       |       |
|---------|-----------------------|-------|---------|----------|-------|-------|
|         | D max                 | T max | p       | d        | L min | A max |
| 600D-05 | 7.0                   | 5.0   | 5.0±0.5 | 0.6±0.05 | 8.0   | 12.5  |
| 33D-07  | 8.5                   | 5.0   | 5.0±0.5 | 0.6±0.05 | 8.0   | 14.5  |

## 3、材料 Material

|                          |                       |
|--------------------------|-----------------------|
| 封装材料<br>Coating material | 硅树脂<br>Silicone resin |
| 引线材质<br>Wire materia     | 镀锡线<br>Tinned wire    |
| 产品颜色<br>Color            | 绿色<br>Green           |

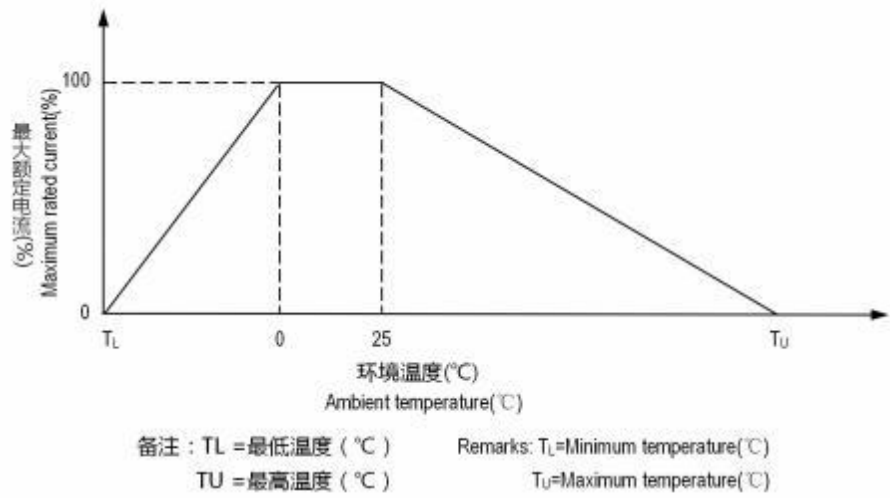

## 4、电气特性 Electrical Characteristics

| 项目<br>Item                                        | 单位<br>Unit | 性能要求<br>Performance requirement |           |
|---------------------------------------------------|------------|---------------------------------|-----------|
|                                                   |            | 600D-05                         | 33D-07    |
| 25℃时零功率电阻<br>Zero Power Resistance at 25℃         | Ω          | 60Ω±20%                         | 33Ω±20%   |
| 25℃时最大稳态电流<br>Maximum steady state current at 25℃ | A          | 0.5                             | 1         |
| B 值 25/50<br>B value 25/50                        | K          | 2700± 10%                       | 2850± 10% |
| 最大电流时近似电阻值<br>Approx. R of Max. Current Rmax      | Ω          | 3.446                           | 1.248     |
| 最大额定功率<br>Maximum rated power                     | W          | 0.8                             | 1.2       |
| 240Vac 时的电容值<br>Capacitance at 240Vac             | μF         | 100                             | 150       |
| 耗散系数 (约)<br>Dissipation coefficient(Approx.)      | mW/℃       | 7                               | 8         |
| 热时间常数 (约)<br>Thermal time constant(Approx.)       | sec.       | 20                              | 30        |
| 工作温度范围<br>Operating temperature rang              | ℃          | -40 ~150                        | -40 ~170  |

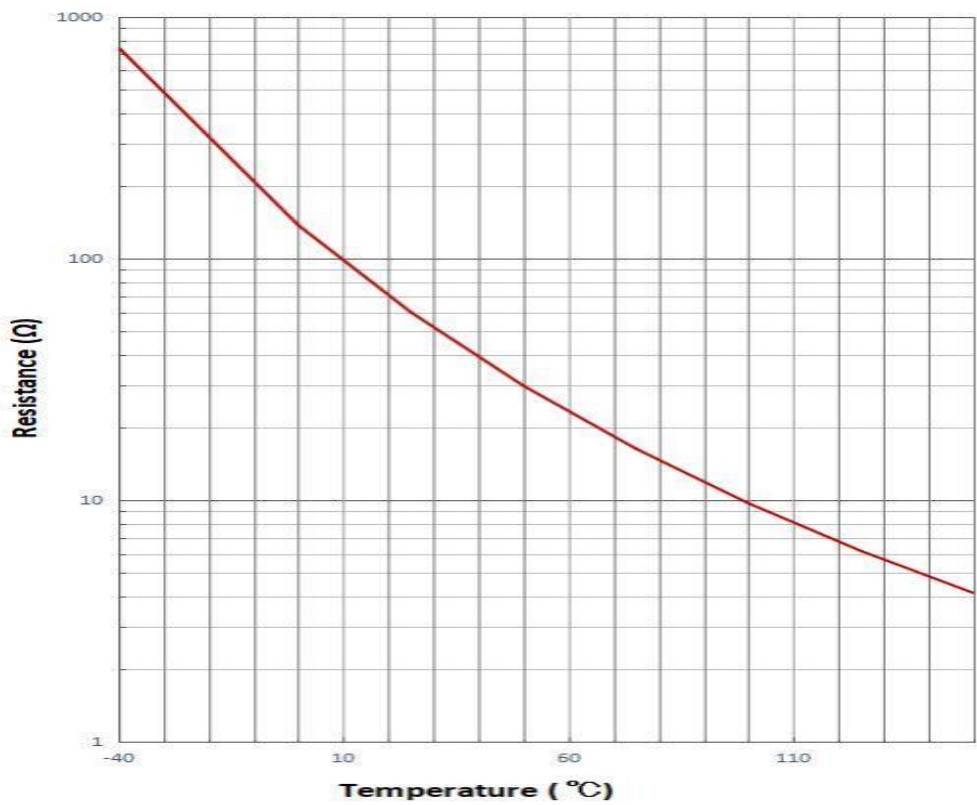

## 5、产品测试 Product testing

| 项目<br>Item                            | 测试条件和方法<br>Test conditions and methods                                                                                                                                                                               |                      |                |  | 测试标准<br>Standard                  | 技术要求<br>Technical requirements                                                      |

### 6、降电流曲线 Reduced current curve

### 电阻温度曲线 R&T-table

## 伏安曲线 Volt-Ampere curve

## 7、注意事项 Matters Need Attention

1 本产品的用途：抑制浪涌电流

This product USES: Inhibition of surge current

2 烙铁焊接时，焊接处距涂装层距离至少 2mm，焊接温度应低于 360℃，焊接时间 < 3 秒

When the soldering iron welding, the welding place at least 2 mm space from coating layer and the welding temperature should be lower than 360 °C, welding time < 3 ses

3 储存温度： -10℃ ~ 40℃；储存湿度： ≤75% RH

Storage temp:-10℃ ~ 40℃;storage humidity:≤75% RH

4 避免存放在具有腐蚀性气体及光照的环境下

Avoid air corrosion or sunlight

5 包装打开后需重新密封保存

Remake sealed storage after package opening

6 储存期限： 1 年

Shelf life: 1 year

## 热敏电阻产品外观覆盖涂料材质说明

### Material description of coating for appearance of thermistor products

1. 本公司 功率型 NTC 热敏电阻产品外观覆盖涂料材质为硅树脂涂料， 此涂料具有绝缘性佳、耐高温、散热速度快等特性。

The coating material of power NTC thermistor is silicone resin. Coatings, this coating has good insulation, high temperature resistance, fast heat dissipation and other characteristics.

2. 此涂料材质相当坚固，但是韧性较差，如果受不当外力的情况下（如：搬运重摔，将引脚向外掰，插 PCB 孔径与热敏电阻脚距不匹配，作用力不当的掰引或弯脚），可能会使产品产生脚裂的现象；还由于硅树脂的材料特性，产品在运输的过程中，本体会因为摩擦易出现摩擦痕迹的现象，可人工擦除，此种现象完全不影响产品特性； 因此上述出现的轻微脚裂及擦痕现象,经我司试验绝对不会影响产品本身的特性，敬请放心使用。

The material of this coating is quite strong, but its toughness is poor. If it is subjected to improper external forces (such as: heavy lifting, breaking pins outwards, inserting PCB aperture and thermal resistance foot pitch mismatch, inappropriate force to pull or bend feet), it may cause foot cracking of the product; also because of the material characteristics of silicone resin, the product In the course of transportation, the body will be easily rubbed because of friction, which can be erased manually. This phenomenon does not affect the characteristics of the product at all. Therefore, the slight foot cracks and scratches mentioned above will not affect the characteristics of the product itself after our company's test, please rest assured that use.
