## NOTES:

1. Rating: 300V 15A;
2. Insulation Withstands Voltage: AC2000V/MIN
3. Insulation Resistance: 500M $\Omega$  or more at DC500V
4. Using Temperature Range: -40° C/+105° C
5. Screw Torque Vlaue: 0.4N.m
6. Suitable Electric Wire: 28~12AWG
7. "★" is the important dimension.

A-A

| Total Pitch Tolerances<br>in mm |                        |                        |                        |                         |                          |                          |                          |                          |                           | Nominal dimension range<br>in mm |                        |                        |                        |                         |                          |                          |                          |                          |                           | $\perp$    |     | $\div$                 |                          | $-$         |  | $//$ |  |
